

Additional tips to help with the application process:

- Enter the participant information. For Family Camp or the Caregivers Retreat, please provide the survivor's information as the participant. There will be a section in the health profile to provide information about the caregiver/family members.
- On the Registration page, click "Register for a new session" to see the list of camps the participant is eligible to attend. Participants are welcome to apply for Family Camp or the Caregivers Retreat in addition to their individual camp, but may be asked to choose as space is limited. Add the preferred session and click continue.
- When you click "Register" on the Confirmation page, you should see a pop-up stating you have successfully registered. **Do not stop here!** Click ok, and you will be able to access the application questions in the health profile.
- A red dot in front of a health profile section name indicates there are required questions in that area. Once a section is complete, you will see a green check mark.
- If you have applied using CampDoc in the past, some questions will auto-fill prior answers. Please update accordingly. Click on the "Confirm Information" box at the bottom for the answers to save.
- CampDoc will automatically be saving as you work through the form. You can go back to edit or finish information if needed.
- You should see a message pop up saying "Heath Profile Complete" and receive an email notification when you have filled the application out to 100%. Don't worry that there isn't a submit button, it has been saving as you go.
- If you have an additional camper to register, click on "Add new participant" to start the process for your next camper.
- The physical form is available to download from within the health profile, in the Physical Form section, for those who wish to be proactive in providing the form to their doctor prior to receiving a status update.
- If accepted to attend, there will be additional forms added to the health profile that will require your attention.
